ACUTE CARE SOLUTIONS

CHALLENGES IN ACUTE CARE

RISK OF INFECTION

Healthcare-associated infections jeopardize patient recovery and compromise staff member health.

HCAHPS SCORES

After their stay, patients rate the cleanliness of Acute Care facilities, influencing the hospital's pay and budget.

LABOR CHALLENGES

EVS Technicians' roles require long hours in high-stress environments, leading to high industry turnover.

HOW RCP CAN HELP

SUSTAIN A CLEAN ENVIRONMENT

CLEAN AND DISINFECT EFFECTIVELY

Cleaning and disinfecting high-touch areas is vital to breaking the chain of infection.

DISPOSE OF HAZARDOUS WASTE PROPERLY

Disposing of biohazardous waste properly reduces the spread of disease.

IMPROVE FOOD SAFETY

Reduce the risk of cross-contamination and foodborne illnesses with proper foodservice products.

IMPROVE THE PERCEPTION OF CLEAN

CREATE VISUAL CUES

Color-coded cleaning tools and cloths visually separate dirty from clean.

PRESERVE THE SCENT OF CLEAN

Aromas in Healthcare impact patients' and visitors' perceptions of cleanliness.

KEEP FLOORS SPARKLING

EVS technicians avoid chemicals and cleaning tools that cause floor hazing.

INCREASE EVS TECHNICIAN PRODUCTIVITY

CONSOLIDATE SUPPLIES TO REDUCE TRIPS

Fit all tools needed to clean rooms on one cart, reducing trips back to the storage closet.

CLEAN UP ACCIDENTS QUICKLY

Absorbents clean spills up quickly, so EVS techs can get back to routine cleaning.

REPLACE LINERS WITH EASE

Utility refuse containers feature integrated liner cinches that eliminate the need to tie knots.

BREAK THE CHAIN OF INFECTION

WITH PROPER CLEANING PROCEDURES

1 CLEAN SYSTEMATICALLY, EITHER CLOCKWISE OR COUNTERCLOCKWISE

No surface is skipped; this process saves time and is more ergonomic for users.

2 GO FROM CLEAN TO DIRTY

Cleaning low-touch areas first and high-touch areas last reduces the likelihood of spreading infection and contaminants.

3 CLEAN FROM TOP TO BOTTOM

Any dust and debris dislodged from the top surface naturally falls to the lower surfaces.

4 WIPE IN ONE DIRECTION

Circular wiping recontaminates surface areas, while wiping unidirectionally ensures solution is applied to the whole surface.

CLEANING SOLUTIONS

REDUCE THE RISK OF INFECTION

By using proper cleaning processes and tools with increased efficacy, hospitals can maintain a safer environment for patients, visitors and staff members. Reducing the spread of HAIs is critical to a hospital's bottom line and reputation.

HEALTH AND WELLNESS:

After disinfectants sit on surfaces for their specified dwell time, **remove 99.9% of microbes**, including *C. diff*,* with HYGEN™ Microfiber cloths.

IMAGE:

Keep floors sparkling by utilizing a HYGEN™ Microfiber Dust Mop before wet mopping, to reduce floor hazing and best maintain floor finish.

PRODUCTIVITY:

Reach the highest spaces with ease using the HYGEN™ Quick-Connect System to dust and clean walls and ceilings.

*Based on third-party testing with water only.

MATERIAL HANDLING SOLUTIONS

TRANSPORT SUPPLIES WITH EASE

Keeping tools like safety signs, mops and handles, cleaning solutions and extra paper goods in one, multi-purpose cart helps increase efficiency and limit ergonomic strain. Tidy carts improve a hospital's image to patients, visitors and regulatory bodies.

HEALTH AND WELLNESS:

Carts are made with smooth materials and soft contours, so they are easy to wipe down after use.

IMAGE:

Quiet casters on carts keep hospital hallways quiet and patient stays more pleasant, which directly impacts HCAHPS scores for the hospital.

PRODUCTIVITY:

The High-Security Cleaning Cart stores all tools needed to clean systematically, reducing trips back to storage closets.

REFUSE SOLUTIONS

DISPOSE OF WASTE PROPERLY

Managing multiple waste streams in a hospital is a key task for EVS technicians. Ranging from traditional waste and recycling in common areas to biohazardous waste in patient rooms, EVS technicians must use proper procedures to safely and efficiently manage waste.

HEALTH AND WELLNESS:

Hands-free, step-on containers keep biohazardous waste contained in patient and operating rooms.

IMAGE:

Decorative waste containers are aesthetic options for lobbies and common areas in the hospital.

PRODUCTIVITY:

Integrated venting channels in BRUTE® and Slim Jim® containers make lifting liners easier for EVS techs as they dispose of waste.

WASHROOM SOLUTIONS

IMPROVE HYGIENE IN THE WASHROOM

Washrooms are a hotspot for pathogens in hospitals, so it is critical to have fixtures that promote cleanliness in the space. Touch-free fixtures eliminate key touchpoints in visitor restrooms, leading to a more hygienic experience for guests.

HEALTH AND WELLNESS:

RCP AutoFoam and AutoFaucet® fixtures are touch-free solutions that **enable visitors to use proper hand hygiene** to wash off potential pathogens.

IMAGE:

The TCell™ is a sleek odor control system that utilizes advanced fuel cell technology to **neutralize odors and preserve the scent of clean** in hospitals.

PRODUCTIVITY:

LumeCel™ uses indoor light to self-power, **eliminating the need for EVS techs to replace batteries.**

FOODSERVICE SOLUTIONS

IMPROVE FOODSERVICE OPERATIONS

Foodservice solutions in hospitals can often be overlooked, but using tools that reduce the risk of cross-contamination and foodborne illness are critical for patient and visitor safety. Having organized kitchens and best-in-class operations can assist in maintaining a clean environment.

HEALTH AND WELLNESS:

Color-coded, high-heat spatulas help reduce the risk of cross-contamination by keeping common food allergens separated.

IMAGE:

Use food storage containers to keep produce, ingredients and meats organized in the kitchen.

PRODUCTIVITY:

Increase task efficiency by accessing ingredients quickly with ProSave® Ingredient Bins.
