

Insulated Delivery Bags

USE & CARE INSTRUCTIONS

DAILY INSPECTION

Best practice is to inspect all bags and clean thoroughly as needed.

CLEANING

**Insulated bags should NOT be immersed in water.
DO NOT USE in washing or dish-machine.**

General cleaning, wipe clean with damp cloth.

For stubborn stains, use a pH neutral manual dish soap, like Dawn® with warm damp cloth.

Do not use bleach or any other acidic or caustic based cleaning chemicals under any circumstances.

STORAGE

Store bags in a dry, cool environment.

Whenever possible, we suggest placing bags open and upside down on wire racks so they fully dry.

Make sure bags are completely free of moisture before storing.
